

N2321

Toroidal Type Power Supply

N2322

Magnetic Saturation Power Supply Unit

FEATURES AND SPECIFICATIONS:

- Metal housing for RFI shielded and heat shrinkage design
- Especially for CATV systems with high reliability, multi-function, auto controlling
- Wide accommodation of voltage
- Two kinds of transformer are selectable: high efficient Toroidal type transformer and magnetic saturation regulated transformer
- Auto-detecting and warning with whistle and light for overload or shortage, ensuring the safety of the lasting output electrical supply
- Auto or manual restore the electrical supply after fault fixed
- Output capacity: 3A, 6A, 10A, 15A
- Built-in low pass filter for output port
- Output voltage display

Model	N2321				N2322			
	N2321-3A	N2321-6A	N2321-10A	N2321-15A	N2322-15A	N2322-10A	N2322-6A	N2322-3A
Input Voltage(VAC)	100~130/200~240				80~130/160~240			
Nominal Output Voltage(VAC)	60							
Connectors(A)	F-(f)							
Max Working Current(A)	3	6	10	15	3	6	10	15
Protecting Current of Overload(A)	4	7	12	18	4	7	12	18
Time of Auto Restoration (min)	5~10
